Representative Burges Says New Law Means Schools for Chihuahuita

Schools for Chihushulta and for other sections of the city, so that every child between the ages of 6 and 14 years can attend achool for at least 120 days in each year, will be one of the results locally of the compulsory education bill, passed at the last session of the legislature and signed by the governor. The bill is the most important educational measure eserpaised in Texas, in the opinion of representative Richard Burges, who returned Tuesday from Austin.

"Texas has never had an educational law that even approached in scope the compulsory education law," said El Pass, where a large percentage of there are 6,800 children in Texas between the ones provided in the bill that have never attended school. This bill makes it compulsory on the parent, suurdian or whoever acts in a parental capacity to the chill, to see that the provisions of the law are lived up to.

Bill Was Fought Bifferiy.

that the provisions of the law are lived up to.

Bit Was Possiki Bitterty.

The bill was fought from its first introduction to its first passage, the of the principal points of attack was that it authorized i lant officers. The answer to this was that trust officers. The answer to this was that trust officers. The answer to this was that frust of the conditions of self-respecting families but that the highest duty of the state was to bee that children won, for any reason, were being kept from school by their parents of guardians, should get a square seal' as far as a chance for education is concerned. Amother argument advanced by these who opposed the bill was that it would mean a great increase in the school facilities required, as so many more children would attend. This squite true, but, carrying out the same line of argument, why have any schools at all? If the state of Texas is poing to educate its children, let it educate all of them. This phase of the bill has a apicial bearing on all Pass, where is large percentage of the Marican children and some others, have not been regularly attending achool as second of tack of proper facilities. Texas has never had cock a bill on the statute books and its conclusive index in the grantest step forward along colucial coult lines that the state has ever taken.

"Pasc Advertising" RIN Low.

The Take advertising bill filed of too many amendments. One of the

"Fake Advertising" BHI Look.

The Take advertising bill died of the must amendments. One of the immediments provided first any person irculating a Faululent advertisement would be deemed guilty under the provisions of the art. This, of course, would include even a newshoy, who inight he selling a paper without any knowledge of whist it contained. Other amendments completely changed the intent of the bill and finally in the playing hours, the provision question was moved. This meant a vote and the bill, no longer subject to amendment, was voted down. I think that the bill will be taken up at the next general needs on the state of the provised and in a before room.

Mining Still Fwilted.

"I regret very much that the amend-ment to the mining law, fixing royalties on a net invised of a gross basis, and not get through. It passed the loute but the congested condition of the calender in the senate made it impossible to pass it. Many mining men with whom I have talked grently favor the amendment as it would promote the mining industry in this state. I have some hope that it will be submitted by the special senator.

stations established. Hill Passes,
Frigation Bistrict Hill Passes,
The prigation Bill, which was
drawn under the direction of the secreturn of the invertor and presented
by fin, was passed without opposition
and in more in the bunds of the mercenter. This bill, as I understand it, is
one of a series of measures prepared
by the department of the interior for
passage in various irrigation states to
make the legislation resurding the
irrigation affairs uniform. The higcest point in this measure is the power
given to brigation districts to enterinter contracts with the federal government.

Tals has not been possible in the

box been private corporations in the push but, under the masure, may become unasi-public corporations. The law also specifies just how an irrigation after the box proposed.

Werests to be degalated.

The forestry bill is not a local research, as it provides for statewise forestry minutes, including a state forest and the regulation of forestry. We are offering unner this plan is acres at law to be made into forest statewise of land to be made into forest soverves. It has been my idea for many years that the forest in the Garding mountains should be made a forest remove. These lands are university lands and I think this can be done by the action of the board of regents of the university and that legislation will not be necessary.
